SUMMARY

Aspiring Frontend Developer and BSCS Final year student skilled in Html, CSS, JavaScript, and ReactJS. Highly motivated in developing and optimizing web applications for users. Seeking ReactJs Internship to enhance my frontend skills and gain industry experience.

PROJECTS

News App

- Designed and implemented a news feed React app with News API, showcasing exceptional attention to detail and user-centric design principles.
- Successfully integrated infinite scroll functionality, allowing seamless browsing and eliminating the need for manual pagination.
- Demonstrated proficiency in utilizing React Router to enable smooth navigation between 6 news categories, enhancing user experience.
- Achieved seamless integration with News API, enabling the app to fetch and display daily news updates across various categories, ensuring users stay informed and engaged.

Trek Budy (FYP)

March 2023 – Present

- Trek Budy a MERN Stack-based trip planning website that provides trip aggregation to users.
- Core features include 3 packages according to the user's budget and dedicated portals for vendors and hotel management.
- Backend Implements Authentication and Authorization with Node.js and JWT tokens.
- Frontend build on ReactJs with efficient state management and react-router integration.
